CHAPTER IV

THE CENTRAL BANK AND NATIONAL MONETARY POLICY

PART I—DOMESTIC MONETARY STABILIZATION

Principles governing determination of domestic monetary policy.

63. (1) The Monetary Board shall endeavour so to regulate the supply, availability, and cost of money as to secure, so far as possible by action authorized by this Act, the objects mentioned in section 5; and shall for such purpose have regard to the monetary needs of particular sectors of the economy as well as of the economy as a whole.

(2) In determining its domestic monetary policies the Monetary Board shall especially consider their effects on Sri Lanka's international financial position as evidenced by the relation of domestic to world prices and costs, by the level and composition of exports and imports, by the international balance of payments, and, ultimately, by the ability of the Central Bank to maintain the international stability of the Sri Lanka rupee and its free convertibility for current international transactions.

64. (1) Whenever the Monetary Board anticipates economic disturbances that are likely to threaten domestic monetary stability in Sri Lanka or whenever abnormal movements in the money supply or in the price level are actually endangering such stability, it shall be the duty of the board—

Action to preserve monetary stability.

- (a) to adopt such policies, and to cause such remedial measures to be taken, as are appropriate in the circumstances and authorized by this Act; and
- (b) to submit to the Minister in charge of the subject of Finance, and, if not prejudicial to the public interest, make public, a detailed report which shall include, as a minimum, an analysis of—

- (i) the causes of the anticipated economic disturbances, or of the actual abnormal movements of the money supply or the price level;
- (ii) the probable effects of such disturbances or movements on the level of production, employment, and real income in Sri Lanka; and
- (iii) the measures which the Monetary Board has already taken, and the further monetary, fiscal, or administrative measures which it proposes to take or recommends for adoption by the Government.

(2) Without prejudice to the generality of the provisions of subsection (1), it shall be the duty of the Monetary Board to submit a report in terms of paragraph (b) of that subsection if at the end of any month the board finds that the amount of the money supply has increased or decreased by more than fifteen *per centum*, or the cost of living index has increased by more than ten *per centum*, of its level at the end of the corresponding month in the preceding year.

(3) The Monetary Board shall continue to submit further reports periodically so long as the circumstances which occasioned the submission of the first report constitute a threat to domestic monetary stability.

PART II—INTERNATIONAL MONETARY STABILIZATION

Principles governing determination of international monetary policy. [§ 8, Law 10 of 1978.]

65. In determining its international monetary policy the Monetary Board shall endeavour to maintain the par value of the Sri Lanka rupee, or where no determination of such par value has been made under section 3, maintain such exchange arrangements as are consistent with the underlying trends in the country and so relate its exchange with other currencies as to assure its free use for current international transactions.

International Reserve.

66. (1) In order to maintain the international stability of the Sri Lanka rupee and to assure the greatest possible freedom of its use for current international transactions, the Monetary Board shall endeavour to maintain among the assets of the Central Bank an international reserve adequate to meet any foreseeable deficits in the international balance of payments.

[§ 8, Law 10 of 1978.]

(2) In judging the adequacy of the International Reserve, the Monetary Board shall be guided by the estimates of prospective receipts and payments of foreign exchange by Sri Lanka; by the volume and maturity of the Central Bank's own liabilities in foreign currencies; and, in so far as they are known or can be estimated, by the volume and maturity of the foreign exchange assets and liabilities of the Government and of banking institutions and other persons in Sri Lanka. So long as any

part of the foreign currency assets of Sri Lanka are held in currencies which are not freely convertible by the Central Bank, whether directly or indirectly, into special drawing rights or such other common denominator prescribed by the International Monetary Fund or into foreign currencies freely usable in international transactions, or are frozen, the Monetary Board shall also take this factor into account in judging the adequacy of the International Reserve of the Central Bank.

67. (1) The International Reserve of the Central Bank may include the following assets;—

Composition of International Reserve.

- (i) gold;
- (ii) assets in foreign currencies in the form of—
 - (a) documents and instruments of types customarily employed for the international transfer of funds; or
 - (b) demand and time deposits in central banks, treasuries, and commercial banks abroad ; or
 - (c) securities of foreign Governments, or
 - (d) foreign notes and coins ; and

(iii) either the whole, or such maximum percentage of the whole, of the holdings of such drawing rights in the Special Drawing Rights Department in the International Monetary Fund according as may be determined from time to time by the Monetary Board. [§ 8, Law 10 of 1978-]

(2) The Monetary Board shall endeavour to hold at least a nuclear reserve in gold or currencies freely convertible by the Central Bank, whether directly or indirectly, into gold. The board shall particularly consider the prospects of stability and convertibility of all of the currencies in the International Reserve as well as the anticipated demand for such currencies.

Action to preserve the international stability of the rupee.

68. (1) Whenever the Monetary Board anticipates that there may develop a deficit in the international balance of payments of such magnitude as to cause a serious decline in the International Reserve, or whenever there is an imminent threat of a serious decline in the International Reserve, or whenever the International Reserve actually falls to a level which the board considers to be a threat to the international stability of the Sri Lanka rupee, or whenever international payments or remittances are being made which in the opinion of the board constitute an actual or a potential threat to such stability or are prejudicial to the national welfare, it shall be the duty of the board—

- (a) to adopt such policies, and to cause such remedial measures to be taken, as are appropriate to the circumstances and authorized by this Act, and
- (b) to submit to the Minister in charge of the subject of Finance a detailed report which shall include, as a minimum, an analysis of—
 - (i) the nature, causes, and magnitude of the actual or potential threat to the international stability of the Sri Lanka rupee; and
 - (ii) the measures which the board has already taken, and the further monetary, fiscal, or administrative measures which it proposes to take or recommends for adoption by the Government.

(2) The Monetary Board shall submit further periodical reports to the Minister in charge of the subject of Finance until the threat to the international stability of the rupee has disappeared.

(a) to increase the liquidity or stabilize the values of the securities referred to in section 91 in order thereby to promote private investment in such

securities; and to prevent or moderate sharp fluctuations in the quotations of such securities, so, however, as not to alter fundamentally movements in the market resulting from basic changes in the pattern or level of interest rates;

(b) to increase or decrease the supply, availability, and cost of money, in accordance with the national monetary policy as determined by the Monetary Board.

(2) In conducting open-market operations in Government securities, the Central Bank shall have regard to the need for maintaining adequate holdings of short-term securities in order to enable the bank more readily to contract its credit if such contraction becomes necessary.

(3) If the Monetary Board determines that it is necessary so to do by reason that, in the opinion of the board, there is in progress, or has occurred, an expansion of the money supply or of bank reserves that represents a threat to the domestic or international monetary stability of Sri Lanka, the board shall take action to secure—

(2) The reserves required to be held by any commercial bank shall be proportional to the volume of its deposit liabilities and shall ordinarily take the form of rupee deposits in the Central Bank:

Provided that the Monetary Board may in its discretion permit the maintenance of any part of the required reserves in the form of assets other than rupee deposits in the Central Bank.

(2) Any increase of the reserve ratio which is to be applicable in respect of any existing liability shall be made by the board in a gradual manner and shall not exceed four percentage points in any one period of thirty days. The board shall, except in extraordinary circumstances, endeavour to give the commercial banks at least fourteen days' notice of the date on which any such increase is to become effective.

95. (1) Notwithstanding anything in section 94, the Monetary Board may, during periods of inflation or when inflation is anticipated, prescribe reserve ratios not exceeding one hundred *per centum* in respect of the amount by which any commercial bank's deposit liabilities of any class may, after the date on which notice is given to that bank of the fixing of the new reserve ratio, exceed the amount of such deposit liabilities of that bank on that date.

Fixing of special high ratios in time of inflation.

(2) In any case where any commercial bank is required, by reason of the exercise of the powers conferred on the Monetary Board by subsection (1), to maintain a minimum reserve against any class of deposit liabilities of an amount exceeding the maximum amount specified in section 94 (1) for that class of deposit liabilities, the Central Bank shall pay to that bank interest on the amount in excess at a rate not higher than the Central Bank's lowest discount rate for the time being in operation.

96. The required reserves of each commercial bank shall be calculated weekly on the basis of the amount, at the close of business on such day of each week as may be prescribed by the Monetary Board, of its deposit liabilities against which reserves are required to be maintained.

104. (1) The Monetary Board may from-time to time make order—

- (a) fixing the maximum rates of interest which commercial banks may pay upon various classes of deposits; or

(2) Subject as hereinafter provided, the maximum rate of interest fixed by order under subsection (1) shall apply in relation to any deposit, or to any loan or credit operation, as the case may be, completed before the date on which the order comes into force:

Provided, however, that nothing in any such order—

- (a) shall apply in relation to any interest accrued before that date ; or
- (b) shall require or be deemed to require the reduction of the rate of interest payable upon any deposit completed before that date if such reduction would constitute a breach of the contract or agreement relating to such deposit.

(3) For the purposes of preventing evasion of any order made under subsection (1), the Monetary Board may from time to time prescribe the maximum rates which may be paid to or charged by commercial banks in the form of commissions, discounts, fees or other payments whatsoever.

(2) The Central Bank may, in addition to exercising the functions mentioned in subsection (1), act as agent of the Government for the purposes of any matter or transaction if it is authorized so to do by the Minister in charge of the subject of Finance after consultation with the Monetary Board.
